

Bugs Seeded List

Team 10 - MusiQueue-Web

Defect No.	Defect	Output Before Seeding	Output After Seeding	Suggested Correction	Severity
1.	Hub names not properly displayed on user main hub	Hubname displays properly	Hubname is not displayed just "Hub:".	Display the variable for hub name.	1
2.	Logout button always displaying	No logout displayed when not logged in	Logout displayed always.	Add check if the user is currently at login page	1
3.	Hub name search is case sensitive	Keyword converted to lower case before search	Search is case specific	Convert search input to all 1 case before searching	2
4.	Songs in queue ordered incorrectly	Songs ordered in queue	Songs not ordered	Order songs by number of votes descending	1
5.	Hub pin fails to restrict user from entering	Hub pin must match	Any pin or word is accepted	Add check to validate correct PIN	2
6.	Shows email instead of username for a user	Username displayed	Email always displayed	Insert username instead of email	2
7.	Banned users are allowed to rejoin hubs	User is placed on ban list	User is not placed on ban list	Add user to list of kicked users and checked	2

				when they try to join a hub	
8.	Swap redirection of join hub and create hub buttons	Buttons go to pages as expected	Buttons lead to opposite pages	Swap	1
9.	Most recent hubs should be sorted from most recent to least recent	Hubs sorted by most recent	Hubs sorted by oldest	Sort hubs in proper order	1
10.	Nickname should not allow whitespace	Nicknames cannot have whitespaces	Whitespaces allowed in nicknames	Check user input for whitespace and throw error if exists	2
11.	Multiple searches should create a new result list each time	A new list of results is displayed with each search	Old results are appended to every search	Reinitialize results list on each search	1
12.	Standard users should not have ability to remove songs	Standard users cannot remove songs from hub	Standard users can remove songs from hub	Check creator of hub against current user when displaying remove elements	1
13.	Create a list (hubs or users) with one less item than expected	List contains every item it should	List missing one element	Properly index the results	1
14.	Youtube only returns 7 results instead of 8	Results has 8 results	Results has 7 results	Set the right number in the query	1
15.	The currently playing song can be removed from the playlist	The current song cannot be	The current song can be	Check song before removing it	1

		removed	removed		
16.	No neutral state in voting	The user can choose to neither upvote nor downvote a song.	The user can only upvote or downvote for a song and the vote cannot be set to a neutral state after voting once.	Keep track of whether the upvote or downvote button has been clicked. If the same button is clicked again, then the vote should be set to the neutral state.	1
17.	Allows user to put more characters in an input than it should	Input is limited to some set size	Input size not limited	Limit the input size	2
18.	Pin allows characters to be typed in but should only be numbers	Allows only numbers	Allows characters and numbers	Only allow numeric input	1
19.	Pin should not allow more or less than 4 characters	Only 4 characters allowed	Non input limit	Add error message for incorrect input size	1
20.	Invalid input error messages don't exist	Messages displayed with input errors	No messages displayed	Add error messages where appropriate	1
21.	Including '.' in input for create hub breaks app	Error message is given prompting invalid input	No message is displayed, and app does not continue	Handle invalid characters in the user's input and show error	2
22.	When a hub creator re-enters a hub, it takes	Goes to admin view	Goes to standard view	Check hub creator against user in views	1

	him/her to a user view instead of admin view				
23.	The last song stays in the playlist even after is finished playing.	The last song is removed from the playlist after it is finished and a newly added song starts playing.	The last song is played again after a new song is added.	Make sure that the last song is removed from the playlist after it is done playing.	1
24.	A user can directly go to someone's hub by creating a hub with that name and any pin.	The user cannot create a hub with a name that already exists and can only join a hub if they provide the correct pin.	The user does not get a prompt and the user can directly go to the hub admin view of any hub.	Provide the user with an alert message if a hub name already exists and do not allow the user to access that hub.	3
25.	There are voting concurrency issues when the same upvote or downvote button is pressed repeatedly.	The user sees that they can upvote or downvote for a song more than once if they press the button repeatedly .	Even pressing the voting buttons repeatedly, the user can only upvote or downvote each song once.	Use transactions or other synchronization tools to prevent a song being voted on more than once by a user.	1
