

Product	Home, Login/Logout		
Date	10/12/2017		
Author	Vincent Maggioli		
Defect #	Description	Severity	How Corrected
HLL_1	The hubs that a user has joined are all erased every time a user logs out of the app and logs back in.	2	When a user is logging in, the user entry in the database is being overwritten. We fixed this by updating the user entry instead of making a new user entry every time a user logs in.

Defect #	Description	Severity	How Corrected
GS_1	email should never be displayed to users	2	change email default to random string
GS_2	no system in place to check for unique usernames or alert if username is not unique	1	add unique identifier to username in hub if duplicates exist
Product	Join Hub		
Date	10/12/2017		
Author	Sairam Galla		
Defect #	Description	Severity	How Corrected
JH_1	The user is always directed to the user hub view of a hub whenever they login to a hub regardless of whether or not the person is the hub owner.	1	Check the user's display name to see if the user is the owner of the hub. Then, route the user to the correct screen accordingly.
JH_2	If a user searches for something that does not exist in the database then nothing happens. It would be nice to know that it tried to find something but no results were found	1	Display no results found when there was nothing related to the search found in the database
JH_3	If a user hits the search by location button, but there are no nearby hubs, nothing happens. It would be nice to know that it tried to find nearby hubs	1	Display no nearby hubs when there are no hubs found within the general area
JH_4	if a user tries to enter a hub with an incorrect pin, nothing happens. It would be nice to be notified that the incorrect pin was given	1	Display incorrect pin when an invalid pin was submitted
